

LIGHT CARTS

ORDINARY LOCATION / INSPECTION

Inspection • Defect Detection Areas • Surface Prep Areas • Production Assembly Lines

LED inspection light carts are a versatile and useful tool for inspecting surface imperfections in various applications. These carts can be equipped with our LEINS2 or LEINS5 Series LED fixtures. These inspection lights provide bright and even illumination, making it easy to identify and examine surface imperfections such as scratches, dents, or cracks. They are commonly used in industries such as automotive, aerospace, and manufacturing, where surface quality is of utmost importance. Each cart provides various adjustment capabilities and can be positioned precisely to provide the best angle and illumination for surface inspection. Additionally, they are designed for easy mobility, with sturdy wheels and lightweight construction, making it effortless to move them to different locations in a facility. Our LED inspection light carts are an essential tool for identifying and analyzing surface imperfections, ensuring high-quality standards are met in various industries including: automotive, aerospace, and manufacturing industries, as well as assembly facilities and quality control environments.
